Programación 2

Trabajo practico: introducción a java

Alumno

Rios Benito Sebastián

Comisión: M2025-4

Profesor

Ariel Enferrel

Tutor

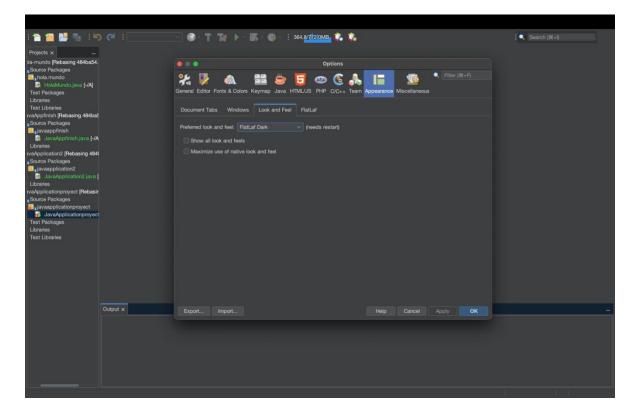

Cinthia Rigoni

17de agosto 2025

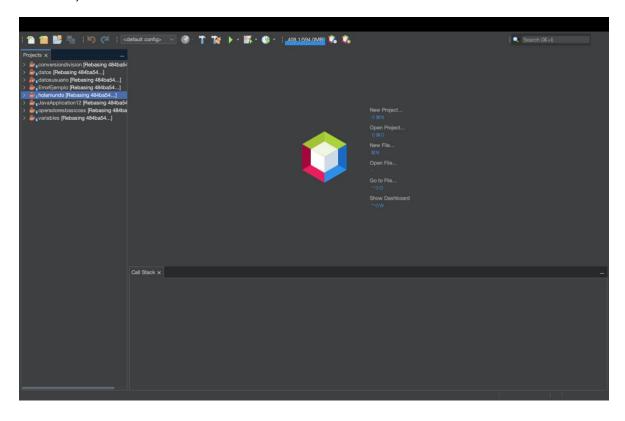

- 1) Verificar si tienes instalado JDK y NetBeans
 - a) Aquí verificamos que tenemos instalado java

```
[sebastianrios@MacBook-Air-de-Sebastian ~ % java -version
java version "24.0.1" 2025-04-15
Java(TM) SE Runtime Environment (build 24.0.1+9-30)
Java HotSpot(TM) 64-Bit Server VM (build 24.0.1+9-30, mixed mode, sharing)
sebastianrios@MacBook-Air-de-Sebastian ~ % ■
```

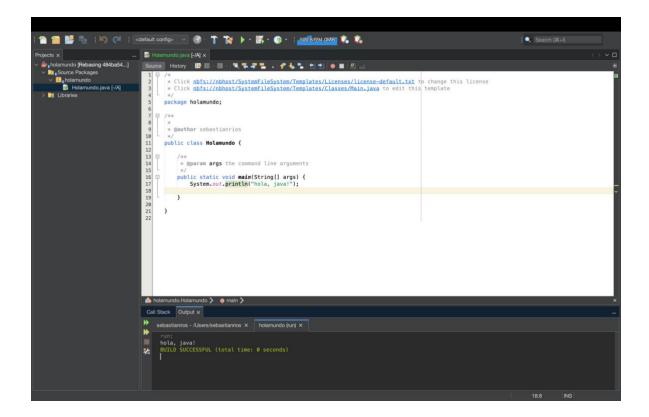

b) Aquí verificamos que cambiamos al modo oscuro NetBeans

c) Entorno de NetBeans

- 2) escribir y ejecutar un programa básico en java
 - a) b) c) hola Mundo, hola java!

3) crea un programa que declare las siguientes variables con valores asignados

```
Projects X
| Concerning Rebains (456abcd.) | Concerning Manager (40) X | Variables (and (40) X | Varia
```

4) escribe un programa que solicite al usuario ingresar su nombre y su edad

```
Projects X

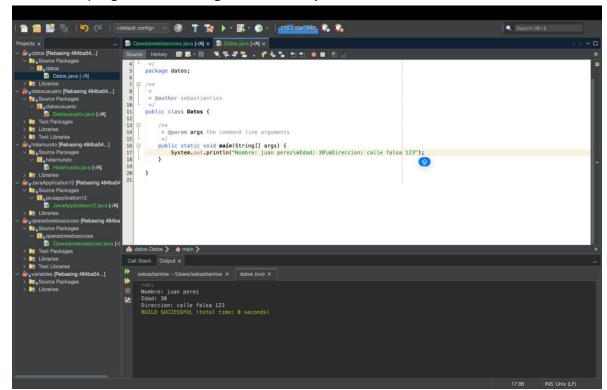

| Course Michael Modes | March | M
```

5) escribe un programa que solicite 2 números enteros y que realice operaciones

```
Project X

| Continuous planating 480a56...|
| Continuous planating 480a56
```

6) escribe un programa con el siguiente mensaje en consola

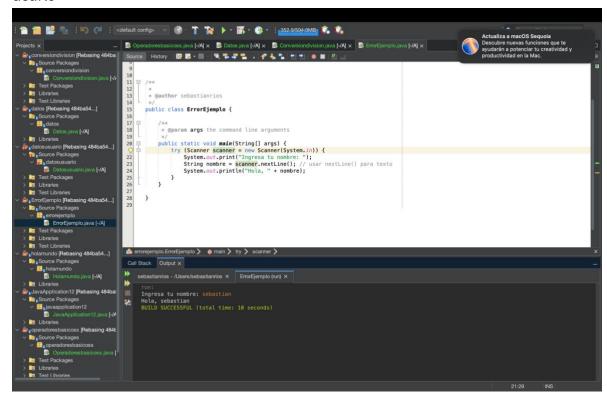

- 7) analiza el siguiente código
 - a) int x = 10; // línea 1 (expresiones = producen un valor)
 - b) x = x + 5; // línea 2 (instrucciones = acciones completas)
 - c) system .out.println(x); // línea 3 (instrucciones = acciones completas) diferencia: una expresión se evalua y se devuelve un valor y una instrucción es una sentencia completa que realiza acciones(declarar, asignar etc)
- 8) manejar conversiones de tipo y division

```
Convenional place and a post and a converse such a place as a set of spot and a converse such as a set of spot and a converse such as a set of spot and a converse such as a set of spot and a converse such as a set of spot and a converse such as a set of spot and a converse such as a set of spot and a converse such as a set of spot and a converse such as a set of spot and a converse such as a set of spot and a converse such as a set of spot and a converse such as a set of spot and a converse such as a set of spot and a converse such as a set of spot and a converse such as a set of spot and a converse such as a set of spot and a converse such as a set of spot and a converse such as a set of spot and a converse such as a set of spot and a converse such as a set of spot and a converse such as a set of spot and a converse such as a set of spot and a converse such as a set of spot and a converse such as a set of spot and a converse such as a set of spot and a converse such as a set of spot and a converse such as a set of spot and a converse such as a set of spot and a converse such as a set of spot and a converse such as a set of spot and a converse such as a set of spot and a converse such as a set of spot and a converse such as a set of spot and a converse such as a set of spot and a converse such as a set of spot and a converse such as a set of spot and a converse such as a set of spot and a converse such as a set of spot and a converse such as a set of spot and a converse such as a set of spot and a converse such as a set of spot and a converse such as a set of spot and a converse such as a set of spot and a converse such as a set of spot and a converse such as a set of spot and a converse such as a set of spot and a converse such as a spot and a c
```

9) corregir código

además de corregir el código donde el error estaba en int y string tuve que investigar sobre Try porque me seguía saltando error y NetBeans me sugirió usarlo

10) prueba de escritorio

línea	а	b	resultado	salida
1	Sin inicializar	Sin definir	Sin definir	
2	Sin inicializar	Sin inicializar	Sin definir	
3	Sin inicializar	Sin inicializar	Sin inicializar	
4	5	Sin inicializar	Sin inicializar	
5	5	2	Sin inicializar	
6	5	2	2	
7	5	2	2	2
